

Trex®

Case Study

Scope

Kelly-Fradet supplied the materials to Maple Leaf Carpentry, to build this beautiful raised deck in Somers, CT. The clients chose **Trex® Select Pebble Gray** decking with the Trex Transcend rail with black round aluminum balusters and Trex lighting throughout the deck. This build maximizes use of the available footprint, and transitions seamlessly to the surrounding landscaping.

Products Used

- Trex Select Pebble Gray
- Trex Transcend rail
- Trex lighting

"Trex has had a long reputation as being the leader in the composite deck market. Customers come to me for Trex because it's durable, time tested, and its low maintenance over the life of the product. Kelly-Fradet is one of the only spots to shop! I think the biggest thing is the customer service. The actual knowledge of the product ... they give you that bigger picture that you can get from anywhere else."
